

HOOK AND CLIP GANGING BRACKET

Ganging Bracket for Moto,
Parlour, and Ziva

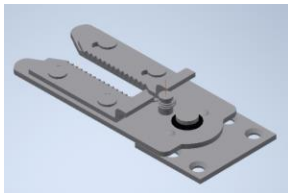

Recommended tools

Hardware enclosed

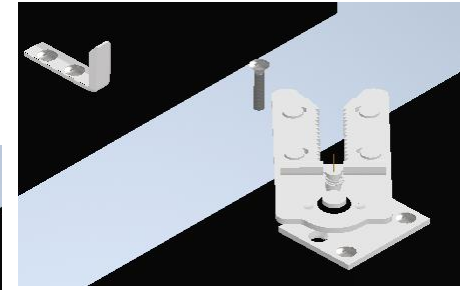

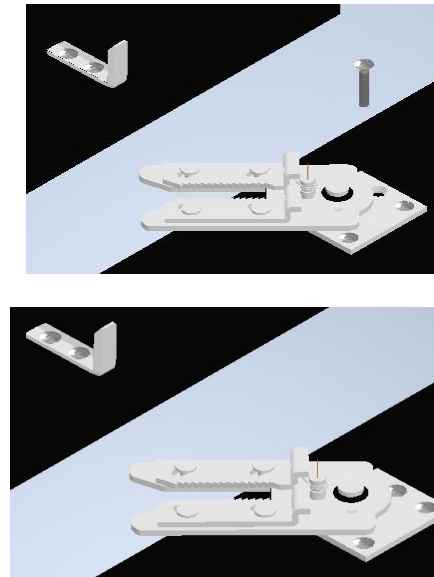

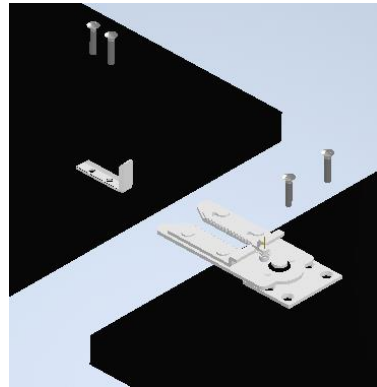

HOOK INCLUDES 2
SCREWS

CLIP INCLUDES 4
SCREWS

NOTE: all screws provided must be installed for proper installation and compliance with product warranty.

Hook Installation

Identify the 2 holes in the middle of the 6 hole pattern of pilot holes on the underside of the chair frame. Attach the hook using the screws provided.

Clip Installation

Identify the 4 holes at the corners of the 6 hole pattern of pilot holes on the underside of that chair frame. Install the 2 screws that are accessible with the clip 2 of the outside holes with the clip in the straight position. Once those 2 screws are secure, rotate the clip so that another screw hole is fully visible and install another screw. Rotate the head the opposite direction to expose the final hole and install the screw. All 4 screws need to be installed in the clip.

Engagement

To gang the two units, simply push the hook side of a unit up to the clip side of the adjacent unit. You will hear 'click' as the hook is engaged in the clip. To remove, lift the unit with the hook until it disengages from the clip.
