Single power infeed with privacy screens

24" x 48"

LOK

POWER AND CHARGING OPTIONS

Single power infeed with privacy screens

Existing jumper cable for connection to adjacent table is redirected toward linked end of table. Additional table is connected from table where infeed is located and routed through the privacy screen end space between tables.

Connect end of cable routed between privacy screens to the 3-way connector. Connect cable from each table to the remaining ends of the 3-way connector. Connect one end 12" jumper cable to the power unit in table top and other end to the power infeed.

NOTE: after all cable connections have been made, secure cables to underside of table top, connect power infeed to building power source.
